

Unique Solutions

Personalised equipment and technology.

CLEVER IDEAS
CHANGING LIVES

What are Unique Solutions?

TAD is dedicated to providing unique assistive technology solutions that improve the wellbeing, lifelong learning, daily living and community participation of people living with a disability.

Our volunteers and therapists work with you to design and build custom equipment, or modify existing equipment, to help improve your quality of life or achieve a specific goal.

What kind of solutions can you make?

Our volunteers are highly skilled in engineering, electronics, metal and woodwork, plastics and more. These wonderful people have made

thousands of different designs since TAD's inception in 1975.

Some examples include:

- Mounts and holders for tablets and smart phones.
- Robotic dog treat dispenser for Assistance Dog owners that is controlled by breath.
- Special cots and change tables to care for your baby.
- Custom desks and modified school chairs.
- Custom pottery wheel and head pointer mounted paint brushes.
- Modified electric trikes and toy cars.
- Custom fishing rod holder.

Steps to get your Unique Solution:

1. **Send us your goals:** Call **1300 663 243** or visit **tad.org.au** to get an Enquiry Form.
2. **Review:** Our therapist and team will review and see if it's a project we can do and if we have a volunteer to take it on.
3. **Volunteer assigned:** We match a volunteer with your project who will visit if necessary. After working with you on the right solution and what materials will be needed, we will provide a quote.
4. **Accept the quote:** Take your quote to NDIS, a different funding scheme or contact us if you are self-funding and need a subsidy.
5. **Test, delivery and achieve your goal!** Your project will be built and brought to you for testing. Sometimes a prototype (or a few) will be made first to try out, once you confirm it is successful we deliver a final version so you can achieve your goal!
